## Customer Reviews

Christian Harder is a writer at Esri and author of Understanding GIS: An ArcGIS Project Workbook Esri Press, 2013, as well as number of other books on GIS. Harder is also the founder and former manager of Esri Press. Clint Brown is the Director of Software Products at Esri.

The concept of the book is amazing and it's executed perfectly as a balance of academic

elements as well as the fun side of technology. The chapters are very well organized, along with the practical exercises to incorporate hands on work. I especially liked the segments of thought leaders which added a very personal touch. I think the book represents a new paradigm for technical training, and I hope there will be more topics planned for future editions.
