Customer Reviews

I wanted to build a wine cellar in a 2'x3' interior closet space in my house in Southern California. The following line in the description convinced me to buy this book, "Follow Tony as he builds his own cellar in his condo." Actually, Tony does not build a cellar in his condo, he builds it in his condo complex. He obtains the rights to convert a rather large space detached from his actual living space.

Further, he lives in Canada where freezing is a major concern in the construction details. He is trying to keep his wine from freezing, I am trying to keep my wine from boiling. The actual construction details were minimal, little use to me. I give it 3 stars because the rest of the content, mostly about wine, and not wine storage, was somewhat thorough.

Good realistic reading for those that want to build a wine cellar. I have several books on this subject, and most cover the basics. This one goes a little deeper and is a good read.
