Insiders Reveal Secret Space Programs & Extraterrestrial Alliances

Synopsis

Classified space programs have been an integral part of a complex jigsaw puzzle concerning UFOs, extraterrestrial life, ancient civilizations and advanced aerospace technologies, which have long defied any coherent understanding. Now finally, we have something to put all the pieces together with the disclosures of secret space program whistleblower, Corey Goode. A detailed investigation of Goode's and other insider testimonies reveals the big picture of a parallel world of secret space programs and extraterrestrial alliances. Learn from this book: how the Vril/Nazi flying saucer programs in the 1930s gave birth to the "Dark Fleet"; how Operation Paperclip scientists both helped and hindered the development of the US Navy's "Solar Warden"; how the MJ-12 Group was behind the creation of the "Interplanetary Corporate Conglomerate"; and how Ronald Reagan was instrumental in the creation of the "Global Galactic League of Nations" space program. Finally, learn how the Sphere Being Alliance and other extraterrestrials interact with these programs. The full disclosure of secret space programs and extraterrestrial alliances will unshackle the chains of deception holding humanity back from reaching its highest potential as galactic citizens.

Being a skeptic, verified proof is essential. Though ample notes are provided, there are still many questions. This read does open a glimpse for a larger picture of governments and society in relation to universal ET existence - very thought provoking. The book also shows that fundamental advanced technology has been around for a very long time (not surprising.) Four star rating is given due to lack of skilled editing. On the whole, I recommend this book only for those interested in the subject, not hindered by a weak stomach for truth.

This book lays out the secret space program like no other. So much mind blowing information! Makes all my other UFO books seem boring. I keep coming back to this one. It seemed a little dry at first so I skipped to the end then went back and read the beginning parts. Some parts are not as interesting so I skipped those. Goldmine of information!

Author has a very keen and intelligent mind who discussed every topic in a very cogent and in depth manner which made my time in reading this a very good judgement call. Every sentence was insightful and very well documented to allow for personal discovery and research. I highly recommend this book as required reading for a solid education, including historical relevance, on the contemporary geopolitical and exopolitical state of affairs. An eye opener for me and I'm very grateful for it.

The material presented in this book is shocking and fascinating. I was especially impressed with Michael Salla's discussion of how Tesla's assistant Otis Carr developed a vehicle powered by anti-gravity in the 1950s, and how Carr's work was destroyed by the US military industrial complex. The story appears to be a replay of how Tesla himself was undermined -- and prevented from fulfilling his life's work. Also impressive was the story of how General Patton's army moved into Czechoslovakia for the purpose of seizing Hitler's top secret research facility at Pilsen, where anti-gravity craft were being constructed. This (and much more in the book) was unknown to me. The author makes the most of the whistleblower accounts available to him; though it is to be hoped that others will soon come forward to confirm or refute Corey Goode's story, much of which is stranger than science-fiction -- and hard to accept. One notable weakness (which explains the four stars undated of five): when I checked the author's sources regarding chapter 4: origins of the dark fleet, I found them to be thin to nonexistent. To date, there is no hard evidence the Nazis established an Antarctic base, at any rate, one above ground. Also, it should be remembered that in May 1945 as Nazi Germany was collapsing, the harsh Antarctic winter was just beginning. The

chances are nil that Nazi U-boats navigated the hundreds of kilometers of heavy sea ice that would have been necessary to reach a presumed base in the southern polar region. This leaves only two options: either the Nazis had a sizable secret base in Argentina, or they had ET help in locating and reaching a pre-existing underground facility on Antarctica.

Michael Salla has once again done a great job in detailing what is really happening out there in Space. Through many of the Whistleblowers he has amassed, especially Cory Goode (one of his major sources), we see a clear picture of what the Secret Space Programs are and who is in charge of them. Granted, much of this information seems far fetched, but considering the technology that we have already, and such science fiction shows such as Stargate SGT-1 (that had a Secret Space Fleet of its own), and was very popular during its run, indicates that the general population would accept this as a possible reality. I know I do! I give this book 5 Stars for deep detailed research and a great help in making me a Believer!

Riveting! Depressing! There is so much correspondence to these allegations in the available literature, it's amazing that so few people are even interested in knowing about our own exoplanetary history and it's impact on "current events."

This was a very well written book. It gave an argument that makes the reader ponder. I will say this, if the end of the novel holds a ounce of truth (each is their own) I would be ashamed of my own country men & women and this would need to be fixed ASAP.

This book is very disturbing. The author mentions a few authors who have produced a literature in this genre of Extraterrestrial 'forms of consciousness' and how humans interact with them. The most important author I have ever found is not mentioned at all. Delores Cannon's 17 books are the most riveting I have ever read. I nominate her books to be the keystone to understanding the whole history of earth and our own relationship with extraterrestrials.
