Algorithms, Complexity Analysis And VLSI Architectures For MPEG-4 Motion Estimation

Synopsis

MPEG-4 is the multimedia standard for combining interactivity, natural and synthetic digital video, audio and computer-graphics. Typical applications are: internet, video conferencing, mobile videophones, multimedia cooperative work, teleteaching and games. With MPEG-4 the next step from block-based video (ISO/IEC MPEG-1, MPEG-2, CCITT H.261, ITU-T H.263) to arbitrarily-shaped visual objects is taken. This significant step demands a new methodology for system analysis and design to meet the considerably higher flexibility of MPEG-4. Motion estimation is a central part of MPEG-1/2/4 and H.261/H.263 video compression standards and has attracted much attention in research and industry, for the following reasons: it is computationally the most demanding algorithm of a video encoder (about 60-80% of the total computation time), it has a high impact on the visual quality of a video encoder, and it is not standardized, thus being open to competition. Algorithms, Complexity Analysis, and VLSI Architectures for MPEG-4 Motion Estimation covers in detail every single step in the design of a MPEG-1/2/4 or H.261/H.263 compliant video encoder: Fast motion estimation algorithms Complexity analysis tools Detailed complexity analysis of a software implementation of MPEG-4 video Complexity and visual quality analysis of fast motion estimation algorithms within MPEG-4 Design space on motion estimation VLSI architectures Detailed VLSI design examples of (1) a high throughput and (2) a low-power MPEG-4 motion estimator. Algorithms, Complexity Analysis and VLSI Architectures for MPEG-4 Motion Estimation is an important introduction to numerous algorithmic, architectural and system design aspects of the multimedia standard MPEG-4. As such, all researchers, students and practitioners working in image processing, video coding or system and VLSI design will find this book of interest.

Book Information

Hardcover: 240 pages

Publisher: Springer; 1999 edition (June 30, 1999)

Language: English

ISBN-10: 0792385160

ISBN-13: 978-0792385165

Product Dimensions: 6.1 x 0.7 x 9.2 inches

Shipping Weight: 1 pounds (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 3 customer reviews

Best Sellers Rank: #2,743,657 in Books (See Top 100 in Books) #102 in Books > Engineering &

Customer Reviews

For mpeg4 motion estimation, it is the only book on the market that well explains and covers with complete algorithms analysis. The references of the papers for each chapter give you more clues about the each algorithm implementation. I would recommend also reference to ISO/IEC 14496-5 MPEG4 codec software and specs to help you understand MPEG4 codec in digital video processing and implementation on streaming media

an exceleent book with deep investigation on motion estimation. you can find most algorithms proposed before with complete references. The author also provides a profiling tool which is so efficent for complexity analysis. you will be able to benefit it definitely :)

You're looking for the alogritm of making video confrence, orany video transfer, this is the book for you! While reading youunderstand where the price coming from! The Author knows the matteralvery well, and lets the reader to understand the mpeg-4 technology!

Algorithms, Complexity Analysis and VLSI Architectures for MPEG-4 Motion Estimation VLSI Test Principles and Architectures: Design for Testability (The Morgan Kaufmann Series in Systems on Silicon) Simply Complexity: A Clear Guide to Complexity Theory VLSI DESIGN SIMPLE AND LUCID EXPLANATION: vlsi design for students Circuits, Interconnections, and Packaging for Vlsi (Addison-Wesley VLSI systems series) Analytics: Business Intelligence, Algorithms and Statistical Analysis (Predictive Analytics, Data Visualization, Data Analytics, Business Analytics, Decision Analysis, Big Data, Statistical Analysis) Analytics: Data Science, Data Analysis and Predictive Analytics for Business (Algorithms, Business Intelligence, Statistical Analysis, Decision Analysis, Business Analytics, Data Mining, Big Data) 4D Modeling and Estimation of Respiratory Motion for Radiation Therapy (Biological and Medical Physics, Biomedical Engineering) Combinatorial Optimization: Algorithms and Complexity (Dover Books on Computer Science) Logic Minimization Algorithms for VLSI Synthesis (The Springer International Series in Engineering and Computer Science) Algorithms for VLSI Design Automation Algorithms for VLSI Physical Design Automation

Random Signals: Detection, Estimation and Data Analysis
Physiological Control Systems: Analysis, Simulation, and Estimation
Evolutionary Algorithms in Theory and Practice: Evolution Strategies, Evolutionary Programming, Genetic Algorithms
Bundle of Algorithms in C++, Parts 1-5: Fundamentals, Data Structures, Sorting, Searching, and Graph Algorithms (3rd Edition) (Pts. 1-5)
Practical Algorithms in Pediatric Hematology and Oncology: (Practical Algorithms in Pediatrics. Series Editor: Z. Hochberg)
Practical Algorithms in Pediatric Nephrology: (Practical Algorithms in Pediatrics. Series Editor: Z. Hochberg)
Practical Algorithms in Pediatric Gastroenterology: (Practical Algorithms in Pediatrics. Series Editor: Z. Hochberg)
Practical Algorithms in Pediatric Endocrinology: (Practical Algorithms in Pediatrics. Series Editor: Z. Hochberg)
