Customer Reviews

You get the feeling the authors have some genuine site experience. They note the everyday dangers of slips, mechanical injuries and drowning in lagoons, as well as those from the properties of the waste. Their advice is to be prepared for the activity you intend and the one you may be faced with. There are useful lists of the boring things you might need, such as rinse tubs for boots and plastic sheeting. Stainless steel is expensive material to use for a drum of waste, they say, so the contents are probably dangerous. -Chemistry and Industry'....offers a straightforward approach to
