Customer Reviews

STEVE OWENS is the popular host of the award-winning television program Oklahoma Gardening, which airs weekly on OETA and reaches 175,000 viewers throughout Oklahoma and neighboring states. A professional horticulturist, Steve has over 20 years experience in the horticultural industry. He has both a Bachelor's and a Master's Degree in horticulture from Oklahoma State University.

LAURA PETERS is a certified Master Gardener with 27 gardening books to her credit. She has gained valuable experience in every aspect of the horticultural industry in a career that has spanned more than 16 years. Laura especially enjoys sharing her practical knowledge of organic gardening, plant varieties and gardening products with fellow gardeners.

I bought this for a shower gift. I've had mine for years and use it often.

As a person not familiar with garden plants in the far western panhandle of Oklahoma I was hoping this book would help me. We have severe winters that can be below -10F and not much precipitation. Some snow and sleet. Very windy. Very hot summers, many times over 100F. Many of

the plants are not like the plants growing in far Eastern Oklahoma. I concur with the another reviewer much better zone growing hardiness information needed. I couldn't find what zone I live in. I assume its the worst zone for growing garden plants and the hardiest plants will be needed that take the least rain. A tiny map on each page with the growing zones would of been perfect. The book has lot of beautiful pictures of many different kinds of garden plants. More than enough for you to have a beautiful garden in the other areas of Oklahoma. Steve Owens and Laura Peters did a great job explaining the different plants, the size they eventually will be, height, how much sun needed and when and how to plant them and how much maintenance is needed except the zone information. Looks like not too much on plants in the Panhandle. I'm not sure about what can survive in the rugged Western Panhandle. For us in the far west Panhandle I feel kind of left out in this book. I'll buy a zone chart to add to this book and take it to the few garden shops local to us to see if I can find local plants cross referencing this book. Recommend this book if you live in Oklahoma outside of the Panhandle and are willing to buy an inexpensive numbered zone chart from 1 to 9. 3 stars

Great book

My wife enjoyed them very much and they were bought for her

Great information by local Oklahoma writer who was long-time host of "Oklahoma Gardening." Very informative. Makes good reading for a real gardener.

Purchased for a gift, and the recipient was very pleased with it.

Good.

Gave me a lot of ideas. I've only been in Ok. a few years (from Florida). I Especially liked learning which plants will do well where in Oklahoma. Good photos.
