Customer Reviews

"The text's strengths are its straightforward approach and delivery of the information. It is well-written and understandable, yet still challenging enough to maintain high standards of educational quality. It does not include the distractions or unnecessary information found in other courts-related texts. Students comment that book is very informative." -- Matthew Crow "Judicial Process in America is a solid textbook, covering all that needs to be covered in a judicial process course, and then some. It is written at a level that undergrads can understand without speaking down to them or dumbing down the material. One of the features I like is that it is clear the authors keep up with the political science literature on judicial politics." -- Mark Hurwitz "Judicial Process in America receives good comments in our course evaluation system. I like it because of the sound scholarship, good organization, and clear, straightforward writing." -- Wesley Skogan "I like the organization of the chapters. They lend themselves especially well to the manner in which I teach my course. The book addresses all of the main topics I am looking for in a textbook. I have used this

book for almost a decade and have always found it engaging and accessible to students." -- Paul Collins "I like the book quite a bit. It's thorough without being repetitive, and it covers a wide range of issues. I think the book is well balanced as is and the feedback from my students is that the book is very helpful." -- Matthew Moore "The book is comprehensive in its coverage of topics, so it is wonderful for students who enter the class with no (or misinformed) knowledge of judicial process. I have used it through several editions, and I have had numerous former students tell me that they retained their copies for future use because of its clarity. One of the real attractions of this book is that the authors are all first-rate scholars, so I have full confidence in the authors' updating." -- Joseph Stewart

Appalachian State University Kenneth L. Manning is professor of political science at the University of Massachusetts Dartmouth. He is coauthor with Robert A. Carp and Ronald Stidham of *The Federal Courts* (Fifth Edition) and *The State Courts*, and coeditor of *Political Perspectives: Essays on Government and Politics*. Manning's work on the politics of judicial decision-making and federal judicial selection have been published in a variety of journals.

I purchased the Kindle version of this for a political science class I was taking. The book is packed full of information and is easy to read, but you may want to take an intro class into the legal system. This was the most challenging class for me so far. There were some minor glitches with the Kindle book, and it could have been a bit easier to navigate. It's probably worth 4.5 stars, but that is not an option.

It helped me understand judicial process a little better. But not great.

Very well written. Usually a topic like this is very hard to follow due to the subject matter, this is very easy to understand and put together nicely.

needed it in a hurry for a college class.

Came as expected.

Good Product!
