Formulas And Calculations For Drilling, Production, And Workover, Fourth Edition: All The Formulas You Need To Solve Drilling And Production Problems

Synopsis

Formulas and Calculations for Drilling, Production, and Workover, All the Formulas You Need to Solve Drilling and Production Problems, Fourth Edition provides a convenient reference for oil field workers who do not use formulas and calculations on a regular basis, aiming to help reduce the volume of materials they must carry to the rig floor or job site. Starting with a review of basic equations, calculations, and featuring many examples, this handy reference offers a quick look-up of topics such as drilling fluids, pressure control, engineering calculations, and air and gas calculations. The formulas and calculations are provided in either English field units or in metric units. This edition includes additional coverage on cementing, subsea considerations, well hydraulics, especially calculating for hydraulic fracturing methods, and drill string design limitations. This practical guide continues to save time and money for the oil field worker or manager, with an easy layout and organization to help confidently conduct operations and evaluate the performance of wells on-the-go. Features a new chapter focused on cementing. Includes on-the-job answers and formulas for today's hydraulic fracturing methods. Provides extra utility with an online basic equation calculator for 24/7 problem-solving access. Covers topics such as drilling fluids, pressure control, engineering calculations, and air and gas calculations.

Book Information

Spiral-bound: 394 pages

Publisher: Gulf Professional Publishing; 4 edition (December 17, 2015)

Language: English

ISBN-10: 0128034173

ISBN-13: 978-0128034170

Product Dimensions: 5.9 x 1 x 8.3 inches

Shipping Weight: 1.1 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 2 customer reviews

Best Sellers Rank: #297,595 in Books (See Top 100 in Books) #31 in Books > Engineering & Transportation > Engineering > Energy Production & Extraction > Drilling Procedures #57 in Books > Engineering & Transportation > Engineering > Energy Production & Extraction > Fossil Fuels > Petroleum #134 in Books > Textbooks > Engineering > Environmental Engineering

Customer Reviews

New Mexico Institute of Mining and Technology, Socorro, New Mexico. Mr. Carter has over fifty five years' experience in domestic and international engineering and management positions in the area

of drilling, completion and E&P waste management with Conoco, Baroid, and several other drilling contractors. He has conducted seminars and schools on fluids, rig equipment, and drilling engineering related subjects associated with drilling optimization, cost reduction, and well control. Tom has served as Chairman of the API standardization committee (SC 13) on Drilling and Completion Fluid Materials. He was a SPE Distinguished Lecturer in 1993 and served as the Editor of the SPE reprint series book on drilling fluids. Currently, he is a member of the Chevron Clear Leader Center serving as a Technical Learning Advisor in Houston. He coordinates and has teaching participation in several subject areas such as Coiled Tubing Operations, Directional Drilling, Drilling Fluids, Drilling Practices, Fundamentals for Drilling and Completion, HPHT Drilling and Completions, and Solids Control and Waste Management. He is still active in several industry organizations and was President of the Houston chapter of the American Association of Drilling Engineers, Coordinator for the SPE North American Forum Series, Membership Chairman of the editorial committee for the Journal of Petroleum Technology and on the Board of Directors for the Ocean Energy Center Society (Ocean Star rig museum in Galveston). He has published 20 technical publications and holds five U.S. patents. He graduated with a BS in Geology from Centenary College in Shreveport, Louisiana in 1963. Norton J. Lapeyrouse was a technical training instructor in oilfield courses with international experience. He developed numerous training programs, courses, and manuals designed for supervisory and field personnel. He was a member of the Society of Petroleum Engineers of AIME., the American Society for Teaching and Development, and the IADC. subcommittee of Well Control Trainers Roundtable.

Excellent organization of material. A "MUST HAVE" book for all oil & gas workers.

Great book but it is a little more for Engineers, I was expecting it to be more for the man on the rig.
