Recreational Gold Prospecting For Fun & Profit

Synopsis

Knowing where to look for gold is a well-kept secret-and a fun, exciting escape from our hectic daily lives. This entertaining, well-written book is for those who have ever thought about looking for gold as a hobby. If you're just starting out in gold prospecting, this is the book for you. Here are straightforward and complete answers to all of your questions about where to go, what to bring, what to do when you get there, and also when you get back home with your new-found gold. The author's vast experience in outdoor recreation and "user-friendly" writing style will help you get ready to enjoy a great family activity that's loaded with fun and profit! Complete with text describing the basic geology properties of gold.

Customer Reviews

This is the first book I purchased on Gold Prospecting and I hit "Paydirt" with it and the author. How many author's do you know that started prospecting when they were 10 years old? WoW, she sure knows what she is talking about. For example, the picture on page 28 showing how to properly size the type of gold pan to the size of each persons hand. Until I read this I didn't even know that a gold pans size made any difference one way or the other. For the novice that is searching on how to get started with Gold Prospecting this book is outstanding. I am sure that I will keep coming back to this book to reread much of it. Some of her "Tips" about how to enhance ones chances of finding and keeping gold while out in the field are priceless and make this book worth more than the money that I spent to receive it.

I really love my nugget bucket. i have everything I need to go prospecting. The Nugget Bucket classifies your material twice 1/2 & 1/4" with one scoop. And with the catch cup at the bottom, all your left with is fine, rich gold bearing pay dirt or dirt, depending on where you're prospecting. The Nugget Bucket saves you alot of time. It's light and very efficient. Please buy one. It would be one of the best decisions you've ever made. I highly recommend this produce to every prospector whether you're highly skilled or a rookie like me.

Although I have only been just recently interested in prospecting for gold and made two trips to gold producing areas (California & Geogia) I found this book to be very helpful. It brought up many areas I had not thought of before and made the experience so much more enjoyable. The author really puts emotion into her lessons through her personal knowledge. It's as if she is talking to you one on one. If you are just getting into this exciting field for the first time, this is a must read and the information will save you lots of time and money if you put the author's advise to use. We are so used to this type of book being written by a man since we think of prospectors being men but this author has had more experience in the field then most of the other male authors books I have read previously. A great read for all.

In preparation for an upcoming fulfillment of my dad's lifelong desire to do "real" gold prospecting, I researched many articles on Gold Prospecting, visited Sutters' Gold Discovery State Park on a recent vacation to Northern California, and purchased various books on the subject. This book, Recreational Gold Prospecting for Fun & Profit, seemed to encompass the most information and give good, solid advice that resonated through other sources. I've always wondered why anyone would shared their prospecting secrets - but the author comes across as a true advocate. Having been involved in other pursuits (elected public office, karate, guest speaker at PSU, etc.), I have found that the best advice is given by those who truely appreciate the activity and feel that they owe others the benefit of their experiences. Gail appears to be such a mentor to all of us want-to-bes. I would recommend this book be one of your initial sources on gold prospecting.

Contains a lot of good information on different methods and locations. Easy to read and helpful.

I learned a few things

enjoy this book . well written

Loved this Product!
